### ADVANTAGES

- Cleanser and sanitizer
- Long life efficiency
- Action against sludge, bacteria and mould
- Spray formulation

### BENEFITS

- Ventilation system cleaning maintenance, removing all dangers for workers' health.
- Bacteriostatic action
- Leave a pleasant fragrance

### MAIN FEATURES

Spray foaming cleanser, for filters and batteries for civil and domestic air-conditioners.

Efficient bacteriostatic action, it inhibits bacteria proliferation normally caused by the dust and dirty. So, it is particularly indicated as sanitizing cleanser.

To keep during the time an efficient prevention action against moulds, fungi, bacteria, it is highly suggested to use this product twice a year during the periodical maintenance and filters cleaning

## APPLICATION AND USE

---

The spray formulation is suitable for residential uses and could be directly applied to split and fan-coil filters. Thanks to its special composition, it creates a dense foam that easily penetrates also inside less accessible parts. It leaves a pleasant perfume of cleaning. Directly spray on the filter or on the battery to treat. Used as pure product, eliminates also the most resistant dirt. Does not damage aluminum nor varnished surfaces. Wait 15 minutes before starting the system again, to let the product act, in order to properly clean.
